

PART 5

OTHER SUPPORT TO THE MAGTF

The programs and systems in this section provide necessary support to MAGTFs. They do not necessarily belong to the Command, Ground Combat, Aviation Combat, or Combat Service Support Elements, but could be used with any one of them, depending on the situation. The programs and systems described in this section are concentrated in the area of nuclear, biological, and chemical (NBC) defense, equipment and uniforms, and other areas that affect the combat effectiveness, survivability, and well-being of individual Marines.
